Welcome to NLNOG Day 2023

WiFi

Welcome! The following general SSIDs are provided:

- **NLNOG-Day2023** (WPA3 802.1X, 2.4GHz and 5 GHz)
- **NLNOG-Day2023-open** (open/OWE, 2.4 GHz and 5 GHz)
- **eduroam** (2.4 GHz and 5 GHz)

You can use **nlnog** / **nlnog** or **guest** / **guest** when using MS-CHAPv2 inside TTLS or PEAP, or choose any username/password combination when connecting with PAP inside TTLS.

The SHA256 fingerprint of the server's certificate is:

35:DB:DD:80:25:41:57:82:8F:6A:6E:28:C9:95:B3:8F:47:D8:64:56:D2:7D:31:30:DC:E1:51:B4:22:25:D4:9B

The subject CN on the certificate is radius.eventinfra.org. It is signed by Let's Encrypt for your convenience, though the fingerprint is the thing to check.

Extra: by default inbound traffic to your device is only allowed from the event-network.
Use **outboundonly** / **outboundonly** as username/password to only allow outbound traffic from your device, giving you basic protection and a way to save battery usage. Alternatively, use **allowany** / **allowany** as username/password to allow any inbound traffic to your device from the internet (and event-network).

For statistics about the event's network infrastructure see: https://dashboard.eventinfra.org
